

1. Which body part works harder when a person exercises?

- A. nose
  - B. heart
  - C. kidney
  - D. stomach
- 

2. Which organ is NOT a sense organ?

- A. eyes
  - B. ears
  - C. nose
  - D. throat
- 

3. Which part of the body controls the functions of other body parts?

- A. heart
  - B. lungs
  - C. brain
  - D. stomach
-

4.

*Use the picture below to answer this question.*

The picture shows food about to be mixed and chopped up in a blender. Which body part functions similar to the blender?

- A. heart
- B. stomach
- C. small intestine
- D. large intestine

---

5. Which body organ removes excess water and wastes from the blood?

- A. kidney
  - B. large intestine
  - C. small intestine
  - D. stomach
-

6. In which body part do gases, such as oxygen and carbon dioxide, pass into or out of the blood?

- A. lungs
  - B. brain
  - C. liver
  - D. heart
- 

7. Messages are carried from the eyes to the brain by

- A. bones.
  - B. muscles.
  - C. nerves.
  - D. blood vessels.
- 

8. The sense organ that helps you keep your balance is the

- A. skin.
  - B. nose.
  - C. tongue.
  - D. ear.
- 

9. White blood cells and antibodies are important parts of the

- A. circulatory system.
  - B. nervous system.
  - C. reproductive system.
  - D. immune system.
- 

10. What is the MOST important gas taken into the lungs during breathing?

- A. carbon monoxide
  - B. carbon dioxide
  - C. oxygen
  - D. hydrogen
-

11. Which of the following helps our sense organs work together?

- A. nerves
  - B. muscles
  - C. blood vessels
  - D. skin
- 

12. The main function of most muscle cells is to

- A. control breathing.
  - B. digest food.
  - C. carry blood.
  - D. allow movement.
- 

13. Which body part plays the largest role in controlling the nervous system?

- A. skin
  - B. heart
  - C. brain
  - D. blood
- 

14. Which of the following organs helps digest food?

- A. brain
  - B. lung
  - C. stomach
  - D. heart
- 

15. The organ that holds solid waste materials before they are passed from the body is the

- A. pancreas.
  - B. liver.
  - C. stomach.
  - D. large intestine.
-

16. When air is inhaled, the lungs

- A. contract.
  - B. deflate.
  - C. inflate.
  - D. relax.
- 

17. All of these organs are sense organs EXCEPT the

- A. skin.
  - B. mouth.
  - C. ear.
  - D. heart.
- 

18. Which organ mixes food with a mild acid and breaks it into a paste-like substance?

- A. liver
  - B. stomach
  - C. kidney
  - D. large intestine
- 

19. In order to support life, the most important gas taken into the lungs is

- A. carbon monoxide.
  - B. nitrogen.
  - C. hydrogen.
  - D. oxygen.
- 

20. Which organ uses muscular contractions to mix food with digestive enzymes?

- A. heart
- B. kidney
- C. esophagus
- D. stomach

## Answer Key

1. B) heart
  2. D) throat
  3. C) brain
  4. B) stomach
  5. A) kidney
  6. A) lungs
  7. C) nerves.
  8. D) ear.
  9. D) immune system.
  10. C) oxygen
  11. A) nerves
  12. D) allow movement.
  13. C) brain
  14. C) stomach
  15. D) large intestine.
  16. C) inflate.
  17. D) heart.
  18. B) stomach
  19. D) oxygen.
  20. D) stomach
